Art Unit: 2826

Serial Number: 09/966914 Attorney's Docket #: MP0115

Filing Date: 9/27/01;

Applicant: Sutardja

Examiner: Alexander Williams

Applicant's Amendment in Paper No. 12, filed 11/25/032 is acknowledged.

This application contains claims 5, 6, 9, 10, 17, 18, 21 and 26 drawn to an invention non-elected without traverse in Paper No. 5.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 to 4, 7, 8, 11 to 16, 19, 20, 22 to 25, 27 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Degani et al. (Japan Patent Application # 08-036034). This can also be seen in figure 7A of Kimura (U.S. Patent Application # 2002/0175421A1).

For example, in claim 1, Degani et al. (figures 1 to 12) specifically figure 1how an integrated chip package, comprising: at least one semiconductor chip 19,20 having a first surface and a second surface; an intermediate substrate 18 electrically coupled via conductive bumps 26 to the first surface of the least one semiconductor chip; a package substrate 12 having a first surface electrically coupled to the intermediate substrate via a plurality of bonding wires 22; and a heat sink 30 thermally coupled to the second surface of the semiconductor chip so that heat generated from the at least one semiconductor chip flows towards the heat sink.

Application/Control Number: 09/966,914

Art Unit: 2826

Claims 1 to 4, 7, 8, 11, 13 to 16, 19, 20, 22 to 25, 27 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Kurokawa (U.S. Patent # 5,291,064).

For example, in claim 1, Kurokawa (figures 1 to 7) specifically figure 6 how an integrated chip package, comprising: at least one semiconductor chip 42 having a first surface and a second surface; an intermediate substrate 41a,41b electrically coupled via conductive bumps 43 to the first surface of the least one semiconductor chip; a package substrate 47 having a first surface electrically coupled to the intermediate substrate via a plurality of bonding wires 46; and a heat sink 45 thermally coupled to the second surface of the semiconductor chip so that heat generated from the at least one semiconductor chip flows towards the heat sink.

Claim 12 is rejected under 35 U.S.C. § 103(a) as being unpatentable over Kurokawa (U.S. Patent # 5,291,064) in view of Degani et al. (U.S. Patent # 5,869,894).

Kurokawa show the features of the claimed invention detailed above, but fail to explicitly show a support material arranged between the package substrate and the intermediate substrate.

Degani et al. is cited for showing a RF IC package. Specifically, Degani et al. (figures 2 and 3) discloses a semiconductor chip 13 having a first surface and a second surface; an intermediate substrate 14 electrically coupled via conductive bumps 16 to the first surface of the least one semiconductor chip; a package substrate 19 having a first surface electrically coupled to the intermediate substrate; and a support material arranged between the package substrate and the intermediate substrate for the purpose of preventing chips noise problems that frequently arise due to interconnects that are long or ineffectively placed.

Therefore, it would have been obvious to one of ordinary skill in the art to use Degani et al.'s support material to modify Kurokawa's package for the purpose of preventing chips noise problems that frequently arise due to interconnects that are long or ineffectively placed.

Art Unit: 2826

## Response

Applicant's arguments filed 11/25/02 have been fully considered, but are moot in view of the new grounds of rejections detailed above.

The insertion of Applicant's additional claimed language, for example, "in claims 1, 13 and 22" cause for further search and consideration to make this action final.

Applicant's amendment necessitated the new grounds of rejection. Accordingly, **THIS ACTION IS MADE FINAL**. See M.P.E.P. § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.

The listed references are cited as of interest to this application, but not applied at this time.
